

Uniform Air Distribution by the Seamless Air Opening

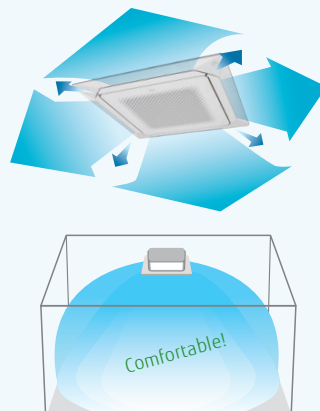

In new model, the gaps between each airflow openings are removed, which enables to distribute wider and uniform airflow to room.

AUAG36 / 45LRD-A

Uniform Temperature Air Conditioning

Achieve a comfortable air conditioning spread to every corner of the room by circular flow & wide vertical airflow.

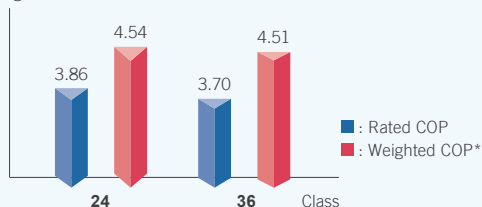

AUAG36 / 45LRD-A

Top Class High EER

The EER figures in this two models can be found in tick 3 in 24 BTU model and tick 2 in 36 BTU model in the energy-saving program in Singapore.

Cooling COP

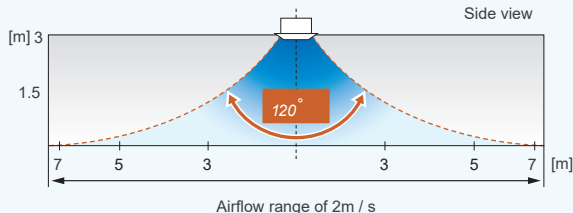

*Weighted COP=0.4xCOP_{100%}+0.6xCOP_{50%}

AUAG24 / 36LR

Long-Reach And Wide Angle Air Flow

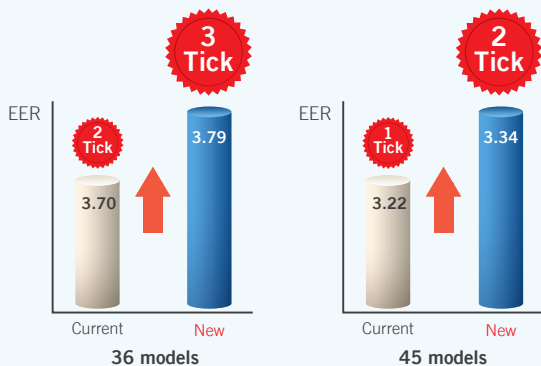

The airflow can be travelled in all directions and at far distance. It enables to produce the best performance in sizable spaces such as office and school.

AUAG24 / 36LR

High Energy Efficiency

Achieve Highly Energy Efficiency Level (Tick) by New Indoor Unit Design and New DC Inverter Control

AUAG36 / 45LRD-A

Wireless Remote Control

Improve the operability and installation work by the wireless remote Controller.

Human Sensor for Energy Saving (Option)

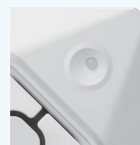

• Human Sensor
2 modes can be selected.

Auto Saving

Power is saved while no one is around

Auto OFF

Operation is stopped while no one is around
